

2020

— THE YEAR OF —

THE TRUST PROGRAM

No excuses means absolute trust in the equipment you use to pursue your passions on the water.

Purchase that gear confident in your choices with our consumer trust program, a four pillar approach to support you in the buying process.

60 DAY GUARANTEE

Ocean Rodeo offers an unconditional, 60 Day Satisfaction Guarantee on every product we sell.

If for any reason you are unsatisfied with your purchase, you can return it to your original point of purchase for a full refund within the first 60 days.

BUYBACK PROGRAM

Enjoy peace of mind with our new BuyBack guarantee.

- Upgrade any brand of kite for up to 50% off.
- Any brand of kite that's less than 24 months old qualifies for the program.
- Guarantee the kite's future value: Buy today with confidence that we will BuyBack your kite anytime in the next two years, no matter its condition.

0% FINANCING

Enjoy up to 12 months to pay for your purchase, interest-free! Combine with our BuyBack Program and ride new kites for as little as \$45 a month.

EXTENDED WARRANTY

Customers who register their products (kites, boards, and drysuits) online automatically receive an extra 6-month warranty.

Visit oceanrodeo.com/TRUST to learn more.

A New Way of Thinking

With the introduction of cutting edge ALUULA Composite materials into our kite construction, an entirely new way of thinking has opened up at Ocean Rodeo. We have discovered a new world of possibilities in terms of kite performance, a world which has the ability to completely revolutionize your kitesurfing experience.

Within most of the sports we enjoy, equipment and materials are directly linked to our desired performance attributes. For example, bikes will mix and match frames, shocks, tires and tubes with myriad opportunities in terms of materials and technologies.

Within kitesurfing, although we have innovated, we have always been limited by the materials we can use. Until now.

The Next Generation

For the last 20 years the kite industry has rewarmed a limited choice of component and material options. In a crowded industry, we've all been using essentially the same things, tweaking them and nudging them and calling it innovation...

Now a new dawn in material technology is upon us, and we now have choices beyond just using Dacron for air frames, ripstop for canopies, and PU film for bladders. The genie is out of the bottle, and it's called ALUULA.

Ocean Rodeo, in partnership with ALUULA Composites, has developed completely new and innovative manufacturing techniques to work with these super lightweight and strong materials. This has allowed us to combine standard industry materials with brand-new composites, enabling us to deliver performance levels that were simply not attainable before.

This season we are proud to introduce Ocean Rodeo kites which are lighter, stronger and more fun to fly. The future is now, so please enjoy the ride. It's getting better and better...

ALUULA A-SERIES

Featuring ALUULA AGx 82 Air Frame

The Lightest, Strongest Kites in the World.

Overview:

The ALUULA A-Series is the dream we've been chasing for the last five years. We went all in, partnering up with ALUULA Composites and developing an award-winning fabric that is the lightest and strongest on the market.

No words can truly capture the improvement in performance of ALUULA-framed kites. They feel completely different to fly, with previously unseen levels of responsiveness, an expanded wind range allowing for insane light wind performance, and incredible precision at the top end.

Try an A-Series and you're unlikely to ever return to traditional-build kites...

Material Specifics:

Air Frame - ALUULA AGx 82 with PU bladders

Canopy - Teijin D2 Double Ripstop

Rider Benefits:

- Improved Performance
- Increased Wind Range
- Insane Strength
- Enhanced Lightwind Capabilities
- Refined Top End Control

FLITE A-SERIES

LIGHTWIND FREERIDE

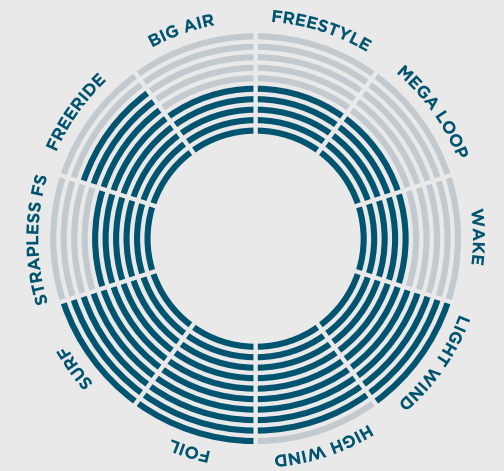

The Flite featuring ALUULA is a 3-strut kite that is highly responsive yet lighter than current no-strut kites, providing optimum light-wind performance, while retaining precision and control in increased wind speeds.

The extreme light weight, combined with the stiff yet reactive ALUULA air frame technology, means larger kites become supercharged, allowing performance levels to increase exponentially.

To further build on the enhancements provided by ALUULA, we have fine-tuned all our light wind manufacturing techniques and components, with the Flite Ultra Lite canopy using proven D2 double ripstop from Teijin.

Incredibly responsive, the Flite excels in all riding styles and with whichever board you are riding. The days of compromise are over. The Flite featuring ALUULA is the world's lightest, strongest, and highest performing light-wind kite!

Sizes: 12, 14.5, 17

ROAM A-SERIES

FREERIDE FOIL BOARD / WAVE

The Roam featuring ALUULA is simply a dream come true for freeride foilers and committed wave riders.

This 3-strut kite with an ultra-light and strong ALUULA air frame allows for precise sheeting control, snappy turns and on-demand kite positioning in light winds. And should the wind pick up, the stiffness of the air frame means that the kite's stability and precision control is retained.

For freeride foiling, kite transitions on the Roam are achievable in the lightest of breezes, and with the deep, low aspect design coupled with the light ALUULA air frame, the Roam will not luff or stall, even in complete slack-line situations.

Unpredictable wind states and formerly unmakeable sections all become opportunities for the rider: the playing field is fully opened up by riding the Roam A-Series.

Sizes 5, 6, 7, 8, 9, 10, 12

DP-SERIES DACRON PERFORMANCE AIR FRAME

Featuring Challenge D2.9

The lightest 3-strut Dacron / ripstop kites in the world.

Overview:

The DP-Series is geared towards experienced riders who demand the highest quality and performance from their kites. Using the latest materials and construction techniques in Dacron, polyester ripstop and PU bladders, the Ocean Rodeo R&D team have focused the DP-Series on ensuring the highest performance levels possible utilizing traditional materials.

Reinforcements have been minimized and used only in key areas, while any areas where material-weight was surplus to necessity have been reengineered, and the excess weight removed.

Both foil and wave riders will appreciate these weight-saving efforts, while Big Air effectiveness rockets skyward.

Material Specifics:

Air Frame - Challenge 2.9 RS Dacron with PU bladders
Canopy - Teijin D2 Double Ripstop

Rider Benefits:

- Lightwind Optimized
- Increased Wind Range
- Enhanced Boosting

FLITE DP-SERIES

LIGHTWIND FREERIDE

As light as a one strut, with the stability of three struts.

The Flite offers dynamic lightwind performance. An excellent companion for all riding styles and board types. Twintips, directionals and foil boards, the Flite's tight, snappy turns, big lofty jumps, forgiving kite loops and effortless water relaunch will get you on the water and riding before the rest.

The Gen 7 Flite: truly the world's only high performance light wind kite.

Sizes: 12, 14.5, 17

ROAM DP-SERIES

FREERIDE FOIL BOARD / WAVE

Using a carefully selected mix of Dacron and ripstop, we have created a super light yet rugged 3-strut air frame.

Although the Roam's design remains familiar in Gen 3, the kite's flying weight has been greatly reduced (weighing-in lighter than most single strut kites), improving its performance not just in light wind, but in all wind conditions.

The ultra light weight and deep foil profile in combination with a moderate arc provide for sharp, responsive turns, maximum drift, and the low-end hover sought out when freeride foiling, or drifting down-the-line on your surfboard.

With the Roam Gen 3, there is no longer a need to compromise on stability and wind range in favour of no struts.

Sizes 5, 6, 7, 8, 9, 10, 12

D-SERIES DACRON AIR FRAME

Featuring Dimension Polyant KPE and Challenge D2.9

Built tough and built to last...

Overview:

Ocean Rodeo's D-Series kites are the foundation of our entire kite line up, with materials and construction techniques that are focused on ensuring maximum durability without compromising high-end performance.

D-Series kites are tuned for all levels and built for riders who want maximum longevity, durability, and demand superior flying capabilities in a wide range of wind conditions.

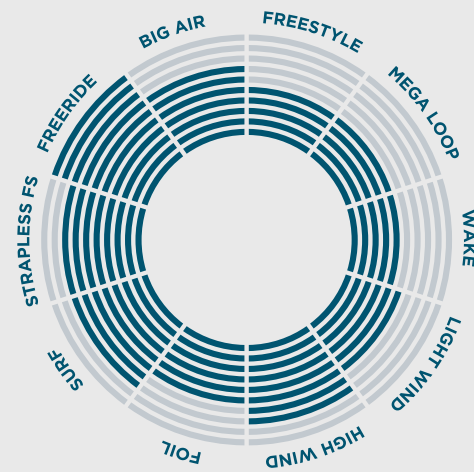

If you want a high performing kite built to the highest specifications which is guaranteed to help you take your riding to the next level, then the D-Series is for you.

Material Specifics:

Air Frame - Dimension Polyant KPE Dacron and Challenge 2.9 RS Dacron with PU bladders
Canopy - Teijin D2 Double Ripstop

Rider Benefits:

- Long-Lasting Durability
- Built For Rugged Use
- Increased Wind Range

PRODIGY D-SERIES

FREERIDE

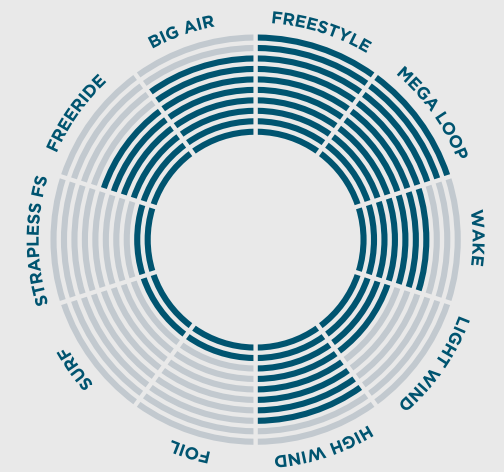

The Prodigy allows you to do it all, with just one kite.

High wind, light wind, waves, freestyle, big air, foilboarding: the Prodigy will deliver the handling and performance to allow you to make the most of any wind and wave conditions.

The moderate arc and ultra stable 3-strut design combined with weight-reducing build techniques are what makes this kite truly a master of all conditions.

Whether you're sneaking a light wind session after work, or pushing the limits in 40 knots, the Prodigy will consistently deliver.

Sizes: 5, 6, 7, 8, 9.5, 12

RAZOR D-SERIES

FREESTYLE / MEGALOOP

Get ready to **#LoopIt!**

With a narrow C-shaped arc for ultra fast turning and consistent power delivery, freestyle riders will appreciate the precise handling and control the Razor delivers, allowing for confident riding and the opportunity to unleash your inner freestyle beast!

With the innovative FST (Forward Swept Tips) design, precision turning input, and optimized turn up stroke, the Razor is also our megaloop machine.

Now in its 8th generation, the Razor is built tough and light, with time-tested materials and construction techniques.

Sizes 7, 8, 9, 10, 12, 14

CRAVE D-SERIES

FREESTYLE / WAVE

The Crave has been designed to meet the demands of GKA Pro Wave Tour riders. Prototypes of the Crave were rigorously tested and proven at all the 2018/19 Tour stops, with top results in both strapless freestyle and pure wave events.

The Crave's signature down-the-line drift is enhanced with refined LE tube diameters and strut shaping. The arc and foil shape have been fine-tuned to deliver the perfect balance of drift and upwind performance, providing a fast turnaround and getting you back to the take off zone in double time...

The Crave is fitted with Forward Swept Tips (FST). A popular feature of the Razor, FST delivers crisp, nimble, and controlled kite loops, ensuring world class performance for strapless freestyle riding. We've also integrated a broad wingtip design to allow for lightning quick water relaunches and maximum flying control, even when the kite is at the extreme edges of the window.

Sizes 7, 8, 9, 10, 12

GEN 9 PUNCHOUT TRIM LOOP

ISO 21853 Compliant

The Gen 9 Trim Loop sets a new standard in ease of use and security.

EASY AUTO RESET (Patent Pending)

The push release cuff remains held in the open and ready-to-reset position at all angles of release. Simply push the free end of the trim loop into the reset chamber and the release cuff automatically snaps back into position.

For added security, the stainless steel release pin is shrouded by the release cuff, guarding your hand from release pin motion during activation.

The push release cuff features an ergonomic grip. A smooth surface on the back side of the cuff reduces accidental activation of the release cuff against the bumps and bangs encountered while riding.

COMPACT BODY INCREASES SHEETING RANGE

The Gen 9 Trim Loop body has been shortened by 1cm, increasing the bottom end sheeting range.

REFINED ROTO HUB

Below bar line swivel "Roto Hub" has been further refined, delivering smooth line twist management. An optional precision stainless steel bearing can be installed to deliver effortless line untwisting.

QUICK CHANGE U SHAPED TRIM LOOP

Swapping in large, small or rope slider trim loop options has never been quicker. A standard fin hex key is all that's required. The trim loop is pre molded into a U shape, making reset even easier when combined with the automatic docking and push reset feature.

TAPERED TRIM LOOP RETAINER

Holds the trim loop in place in the event of slack line or extreme sheeting angles, reducing the chance of unwanted unhooking. Secure lock design between the trim loop retainer and trim loop minimizes false unhooking.

EASY SPIN LEASH CONNECTION

QUICK CHANGE TRIM LOOP

AUTO RESET AFTER EJECT

ROPE SLIDER LOOP

FREESTYLE LOOP

GEN 9 FREERIDE LEASH

ISO 21853 Compliant

This new leash is composed of a HD Spectra line sheathed inside a rugged 8mm urethane tube and features a refined stainless steel carabiner that is lighter, smaller and stronger than previous designs.

The carabiner is housed inside the EVA float and pre tensioned carabiner garage, reducing the chance of line snagging.

SHIFT

The Shift bar is a joy for all styles of riding, and particularly cherished by freeride and wave specialists. Entering its 4th year in production, and fast becoming the future standard of kite control, the Shift has a back line trim that provides reliable and seamless power adjustment, all within easy reach, and without having to take your eyes off the water.

Further new refinements include a reduced diameter grip, resulting in a more direct and tactile feel between the kite and bar. The diamond grip texture has also been refined, making it less aggressive on the hands while still delivering exceptional grip for all riding styles and in varying environmental temperatures.

Other new features include crank stops at the tips of both bar floats, and further refined gearing in the pawl winder assembly for precision trim control every time.

The Shift outfits with the new Gen 9 PunchOut Trim Loop and freeride leash. ISO 21853 compliant, the new Trim Loop and leash are loaded with exciting new features to enhance your ride while delivering reliable release and depower flag out.

Bar Length: 52cm
Line Length: 22m

PILOT

Introducing the new Pilot bar: our cleanest, easiest to use front line trim bar to date.

Combining time tested components and materials, the Pilot bar delivers enhanced precision and control to front line trim, and now features our ISO certified Gen 9 PunchOut system.

Bar length: 46cm and 52cm
Line Length: 22m (19m + 3m)

Universal Stopper (coming soon)

Easily adjusted, single handed, on-the-fly bar stopper. The Universal Stopper is quick to add or remove using a simple hex key tool.

SMOOTHY

FREERIDE / FREESTYLE

Built with everything we've learned from almost two decades of twintip design and freeride prowess, the Smoothy is a freeride twintip unlike any other.

A deep, double concave base rides through the chop and delivers a hard carving freeride experience, while the tapered flat rails and bi-axially designed flex provide responsive freestyle performance.

Ideal for those riders looking to progress in their freestyle riding while still enjoying the typical coastal chop when you're not lucky enough to be gliding across a butter-flat lagoon.

Every Smoothy comes complete with Bliss Air pads, straps, and grab handle and Groove 155 polycarbonate fins.

*Boot compatible.

145cm x 45cm 142cm x 43cm 139cm x 42cm 136cm x 41cm 133cm x 40cm 130cm x 39cm

MAKO

SURF / FREERIDE

For 15 years the Mako has enjoyed a reputation as kiteboarding's smoothest, most refined board with deliciously hard biting rails and a chop-taming concave.

Available in four different sizes, the Mako line-up offers surf and freeride enthusiasts of all backgrounds a board suited to their riding style and size, while the wood core ensures your board will survive the rough and tumble conditions and coastal chop in which this board is built to perform.

Every Mako comes complete with Bliss Air pads, straps, grab handle, and Groove 135 polycarbonate fins.

The Mako, a kiteboarding freeride legend.

165cm (KING) 150cm 140cm 135cm

FREERIDE

STRAPLESS FREESTYLE

SURF

DUKE

FREERIDE

The Duke's deep concave ensures this board rides smoothly and balanced over chop, reducing the nose chatter often associated with other directional boards.

The concave also helps the Duke rip upwind, leading to a much more stable board with a massive sweet spot that is good for transitional footwork and landing tricks.

25% lighter for 2020, the refined Duke layup delivers a light and lively ride while continuing its existing legacy of extreme durability.

Each Duke ships with a set of five Pulse composite fins allowing you to run your board as a 3-fin thruster or 4-fin quad.

165cm x 47cm (5'4" x 18")
Volume: 25.3 Liters

FREERIDE

STRAPLESS FREESTYLE

SURF

JESTER

FREERIDE / STRAPLESS FREESTYLE

Lighter and stronger for 2020, we've tuned up the Jester to be even more reactive and fun. Built for riders of all sizes who crave a light and lively ride, or ideal for a smaller, lighter rider who will appreciate the thinned volume and outline.

During the 2018 Pro Tour season, the Jester was the weapon of choice for our pro riders in strapless freestyle. Its flatter rocker profile combined with a deep concave allowed our riders to get up and riding while others remained bogged down...

The Jester: efficient, quick and nimble, and 25% lighter for 2020!

Each Jester ships with a set of five Pulse composite fins allowing you to run your board as a 3-fin thruster or 4-fin quad.

155 cm x 46 cm (5'1" x 18")
Volume: 17.6 Liters

FREE RIDE

STRAPLESS FREESTYLE

SURF

CREEP

STRAPLESS FREESTYLE / SURF

Designed by GKA World Tour competitor Reece Myerscough, the Creep has already delivered several top 10 finishes on the tour.

The Creep rocker has been fine tuned to handle the cross offshore winds and hollow waves of tour locations like Ponta Preta, while still offering competition strapless freestyle performance.

Tuned for balance while spinning, the Creep rotates through shove-its and other technical moves with precision and control.

A subtle single concave serves up effortless 360 opportunities, with contoured finger grooves down each rail for controlled, no-slip strapless grabs.

5'1" x 18" x 2" (55 cm x 46 cm x 5 cm)
Volume: 20 Liters

SURFBOARD TRACTION FULL DECK PAD

It's no secret that with better grip you can drive harder into your turns, stick more landings and ride with more power and control.

The Ocean Rodeo full deck pad delivers superior traction with the added benefit of cushioning for both your feet and your board.

Made with super light yet rugged EVA foam, our 10 piece design allows you to customize your grip layout from minimalist to full deck coverage.

The tail pad features a 25mm raised kicker to keep your back foot in the sweet spot.

Designed to fit most surfboards and is fully compatible with Ocean Rodeo's entire surf-style board line up.

BLISS AIR PADS, STRAPS AND GRAB HANDLE

Highly adjustable, the Bliss Air pads and straps are designed to work with all Ocean Rodeo and most other brands' twin tip kiteboards.

FEATURES

DAMPENING AIR SYSTEM

The durable and sophisticated AIR pillow is located in the heel area of the footpad, and brings unmatched comfort, superior riding performance and increased safety.

TOE RIDGE SYSTEM

Perfectly placed special foam ridge ensures your foot is always aligned and helps 'monkey grip' the board during jumps and transitions.

QUICK STRAP RATCHET

The sophisticated ratchet and durable plastic strap delivers a snug and comfortable fit for every session. Built with marine tested materials to ensure perfect functionality in all conditions.

MEMORY FOAM SYSTEM

Unique memory foam system ensures the foot strap is a secure, comfortable fit without any pinching or pressure points, resulting in exceptional comfort, control, performance and increased rider safety.

GRAB HANDLE

Weighing only 50g, the ergonomically shaped handle provides comfortable grip and handling.

135 x 56

140 x 40

155 x 38

GROOVE POLYCARBONATE FINS

Our rugged injection molded polycarbonate fins, precision foiled with anti-cavitation grooves, deliver incredible control in all conditions.

Standard hole placements with two separate settings lets you tune your fin position forward or back depending on your board style, size, and fin hole locations.

PULSE COMPOSITE FINS

Composite 5-fin surf pack. Run your board as a 3-fin thruster or 4-fin quad.

PRO TOUR BAG

The Ocean Rodeo Pro Tour Bag is designed by kiteboarders for kiteboarders.

Offering the ability to get through crowded spaces quickly and efficiently with our innovative side mounted wheel system, it is both light and exceptionally strong.

Thoroughly tested by our pro riders, the Pro Tour has withstood the ultimate real world test. A full year on the Pro Wave tour, taking in Morocco, Spain, Portugal, Australia, Mexico, Cabo Verde, the US, Canada, and more. Beaten, dragged, tossed and abused, the Pro Tour has taken the hits and is still going strong.

Dimensions: 160 x 55 x 25cm

Weight 3.9 kg

Volume: 220 cubic liters

GO-JOE LEASHLESS BOARD RECOVERY

The Go-Joe is in use in schools worldwide and is the only board recovery device officially endorsed and promoted by both the IKO and PASA, the world's two largest kiteboard instructor certification bodies.

Designed to sit unobtrusively between your feet on the board, you won't even notice the Go-Joe when riding. However, lose your board and the Go-Joe's inflated body will flip your board over for you and catch the wind, sailing the board down wind so that it is never far from you after a crash or hard landing.

REACT 2.5M TRAINER

The React Trainer Kite is a 2.5m, four line kite designed to rig and fly just like full scale kites! The React comes ready to fly, and includes its own trainer harness that doubles as your bag!

PACKAGE COMES WITH:

- 2.5m React kite
- Control bar
- 15m (50') flying lines
- Inflation pump
- Trainer harness / carry bag

START 1M TRAINER

The Start trainer kite is a simple and economical way to experience power kiting.

No inflating, just take it out of the bag, attach the lines and fly! Learning the flying basics on a trainer kite is the safest way to develop the "muscle memory" required to control larger power kites safely. Basic kite flying skills should be second nature before attempting to fly a larger power kite as used in kiteboarding.

PACKAGE COMES WITH:

- 1m Start trainer kite
- 46cm (18") deluxe trainer bar
- 15M (50') flying lines
- Carry bag

SOUL

Where refined design meets technical performance, the Soul is our premium sporting drysuit of choice.

Built to offer you greater flexibility than any wetsuit and customizable levels of warmth, the Soul features our revolutionary Captive Zip design, giving you the ability to choose full “dry mode” or “stand-by mode”.

FEATURES:

- Standby or Full Drysuit mode / Captive Zip self entry
- German made TIZIP Masterseal main dry zip
- Two way captive over flap jacket zip
- Outer chest and waist pocket
- 500 Denier abrasion overlays at knees, buttocks and crotch
- VENTOR salt water resistant, drysuit-specific water proof breathable material
- Neoprene wrist and ankle seals
- Adjustable neoprene neck seal
- Articulated knees and elbows
- Adjustable and removable suspenders
- Removable hood
- German made TIZIP Masterseal crotch relief zip
- Wrist and lower leg “boot cuff” overlays

Sizes: XS, S, M, MK, L, LK, XL, XLK, 2XL, 3XL

HEAT

The Heat features an efficient, clean design to deliver incredible performance and reliability now synonymous with Ocean Rodeo's drysuits.

Built to offer you greater flexibility than any wetsuit and customizable levels of warmth, the Heat features our revolutionary Captive Zip design, giving you the ability to choose full "dry mode" or "stand-by mode".

FEATURES:

- Standby or Full Drysuit mode / Captive Zip self entry
- German made TIZIP Masterseal main dry zip
- Streamlined jacket back (optimized for dinghy sailing)
- Adjustable neoprene neck seal
- Neoprene wrist seals
- Outer chest pocket
- 200 Denier abrasion overlays at knees, buttocks and crotch
- VENTOR salt water resistant, drysuit-specific waterproof breathable material
- Articulated knees and elbows
- Adjustable and removable suspenders
- Integrated dry sock booties
- Reflective screen graphics

BIG PUMP

SMOOTH ACTION, HIGH FLOW

With a massive 2.9L chamber and high volume double action valve, the all new Big Pump will get you pumped up and on the water in a hurry.

Featuring an extra tall body with high air flow piston, anti-sand seals and intake filter, convertible single action valve for double the PSI, a reliable pressure gauge and three attachment fittings, the Big Pump is ready to work with any kite on the market.

TOWEL CHANGE HOODIE

A warm and cozy velour microfiber hoodie / changing robe featuring a large kangaroo pocket and side hand slits for easy access to don or doff your clothing, wetsuit or drysuit.

Great for a post session towel off and warmth against the chill. Doubles as the ultimate post session couch potato / Netflix binge watching attire.

Super soft, absorbent, and quick drying.

One size fits all.

OR CREW HOODIE

Take Ocean Rodeo's No Excuses attitude with you both on and off the water. Our new super soft hoodies are made of 50% cotton and 50% polyester.

OR CREW T-SHIRT

Show the world that you're part of the Ocean Rodeo community with a soft, high quality tee made of 50% cotton and 50% polyester.

OR CREW CAPS

With a variety of styles and designs you're sure to find the hat that suits you best!

30 KNOT INFLATABLE TENT

Tested and proven at demo days with high winds. Be the last tent standing when the winds start to howl and take your demos to the next level.

Premium materials and a rugged construction combined with a stout frame keeps you sheltered while the others are picking up the pieces of their sub-standard tents!

Dimensions: 4m x 4m

OR FEATHER FLAGS

Stand out on the beach with the Ocean Rodeo Feather Flags - a guarantee of quality wherever they're planted!
